A Note on chemistry sets

Ever since the pandemic, chemistry sets have become increasingly problematic to source. Thames and Kosmos seem to change the product numbers annually. We are therefore suggesting that families purchase the C500 set named above. However, Thames and Kosmos do produce a much better chemistry set – C2000 – which is much more expensive. If your finances can stretch to this, this is a much better option. The C500 is adequate for this course however.
